## L2 PROBLEM 3A (5/5 points)

Write a deterministic program, `deterministicNumber`, that returns an even number between 9 and 21.

```
def deterministicNumber():  
    '''  
    Deterministically generates and returns an even number between 9 and 21  
    '''  
    # Your code here
```

```
1 import random  
2 def deterministicNumber():  
3     '''  
4     Deterministically generates and returns an even number between 9 and 21  
5     '''  
6     # Your code here  
7     random.seed(0) # This will be discussed in the video "Drunken Simulations"  
8     return random.randrange(10,21,2)
```

Correct

```
# Possible solutions:  
  
def deterministicNumber():  
    return 10 # or 12 or 14 or 16 or 18 or 20  
  
# or  
  
def deterministicNumber():  
    random.seed(0) # This will be discussed in the video "Drunken Simulations"  
    return 2 * random.randint(5, 10)
```

## Test results

**CORRECT**

## L2 PROBLEM 3B (5/5 points)

Write a uniformly distributed stochastic program, `stochasticNumber`, that returns an even number between 9 and 21.

```
def stochasticNumber():  
    '''  
    Stochastically generates and returns a uniformly distributed even number between 9 and 21  
    '''  
    # Your code here
```

```
1 import random  
2 def stochasticNumber():  
3     '''  
4     Stochastically generates and returns a uniformly distributed even number between 9 and 21  
5     '''  
6     # Your code here  
7     return random.randrange(10, 21, 2)
```

Correct

## Test results

**CORRECT**

EdX offers interactive online classes and MOOCs from the world's best universities. Online courses from MITx, HarvardX, BerkeleyX, UTx and many other universities. Topics include biology, business, chemistry, computer science, economics, finance, electronics, engineering, food and nutrition, history, humanities, law, literature, math, medicine, music, philosophy, physics, science, statistics and more. EdX is a non-profit online initiative created by founding partners Harvard and MIT.
